

Letter of Recommendation

To whom it may concern,

I am writing to provide a reference for **Adrian Bagherpour** in relation to quality assurance and playtesting work.

Adrian contributed QA playtesting for the game *Space Rock Breaker*. During this work, they tested gameplay systems and reported issues in a clear and structured manner. Their feedback included bugs and how to reproduce them, areas lacking gameplay clarity, and other various issues such as typos in UI.

Feedback was consistently provided quickly, and the information supplied was practical and relevant.

Based on this experience, **Adrian** is very suitable for QA testing or playtesting roles.

Sincerely, Waka
